

How To - Activate the LIKE button

Click on “**My Site**”

Under the heading **Configure** Click **Sharing**”.

Next click on **Manage** and scroll down the page

Under this section on the right side check the box beside ‘**Show Like Button**’.

Depending on which device you are using tablet or PC the page view may be slightly different, however, the settings should remain as shown.

LIKE Continued

The screenshot shows the 'Manage' screen for a WordPress site named 'Nan's Farm-Inside Out'. The left sidebar contains navigation options: Stats, Activity, Plans (Premium), PUBLISH (Site Pages, Blog Posts, Media, Comments), PERSONALISE (Themes, Menus), CONFIGURE (Sharing, People), and a bottom bar with My Sites, Reader, Write, Me, and Notifications. The main 'Sharing' settings are as follows:

- Twitter, Facebook, and Google sharing buttons are visible.
- A "MORE" BUTTON is present, with a toggle for "Edit 'More' button" currently turned off.
- The "Label" is set to "Share this: >".
- The "Button Style" is set to "Icon & Text >".
- Under "REBLOG & LIKE", the "Show Reblog button" and "Show Like button" are both turned on.
- The "Comment Likes" toggle is also turned on, with the note "Allow all comments to be Liked by you and your readers".

Depending on which device you are using, tablet or PC, the page view may be slightly different, however, the settings should remain as shown.

Any problems please let us know.
