

## How To – Insert a picture into a Comments Box

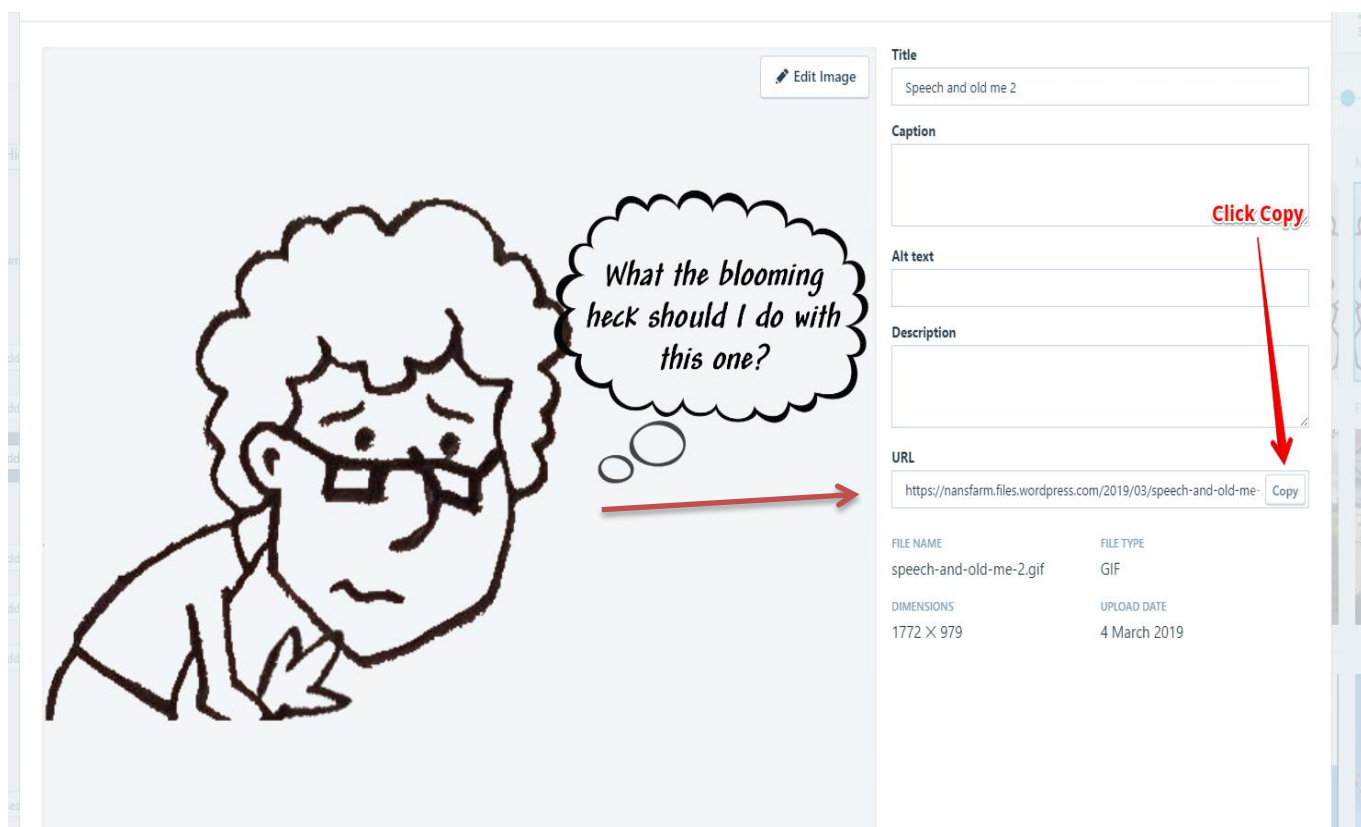

Assuming the photo is saved in your WordPress media file Click on “My Site”  
Open the media file

Choose and click your photo, then click Edit.

Look to the right, Click the URL and click Copy as shown below.

Finally, paste the copied URL/link into a Comments box, either on your own blog or someone else's.

Mostly, the photo will paste into the box. If the photo is too large the link will appear instead but can be viewed easily.

**Note:** The Photo is not visible until after 'Post Comment' is clicked.
